SUMMARY

Ambitious Full Stack engineer with highly proficient technical skills. I enjoy interacting with people of various backgrounds and skill sets to foster productivity and leverage opportunities for personal and professional goals. I am looking for positions that will allow me to widen my understanding and experience in web development.

EDUCATION

Western Washington University
Bachelor's Degree

Bellingham, Washington
Deferred June 2019

My limited college education allowed me to learn the basics and fundamentals of programming which in turn allowed me to develop my understanding of full stack engineering. I am eager to leverage my passion for web development in order to grow as an engineer and to create functional and convenient technologies for other developers.

EMPLOYMENT HISTORY

Western Washington University
IT Assistant

Bellingham, Washington
June 2018 - Present

- Advised the staff and faculty when they ran into issues with their computers, whether it's hardware or software.
- Constructed and maintained an online portal for Western Washington University staff to submit tickets and requests using Javascript.
- Represented IT students during staff meetings when discussing new updates to push to the ticketing system.
- Conducted Q&A with various employees for new features that they would like to see in ticketing system.
- Optimized the life cycle of a ticket to increase productivity.

TECHNOLOGIES
